

EZEQUIEL RIOS KALIMAN

SENIOR DATA ANALYST | ANALYTICS ENGINEER

Bilbao, Spain | erioskaliman@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Senior Data Analyst and Analytics Engineer with nearly six years of experience turning ambiguous business and user needs into trusted metrics, data models and analytical products. Combines SQL, dbt and semantic-layer expertise with product thinking and leadership across technical and non-technical stakeholders.

CORE SKILLS

Data & Modeling: SQL, dbt, BigQuery, Redshift, PostgreSQL, data modeling, semantic layers, data governance

Analytics & BI: Looker, LookML, Power BI, Preset, Cube.js, Google Data Studio, Excel

Product & Delivery: Python, AI agents, RAG, GitHub, KPI definition, stakeholder discovery, user adoption, cross-functional leadership

AI & AUTOMATION

- Production knowledge assistant: Defined product and semantic requirements for an internal assistant built on Azure data and RAG, used by executive, sales and operations stakeholders.
- Operational AI agents: Designed system prompts, validation rules and mapping logic for NinjaCat workflows that automate account permissions and surface unlinked advertising accounts.
- Applied AI training: Completed DeepLearning.AI courses in AI Agents in LangGraph (Apr 2026) and Long-Term Agentic Memory with LangGraph (May 2026), supported by personal agent-workflow experiments.

PROFESSIONAL EXPERIENCE

Senior Data Analyst | Analytics Engineer

AffinityX | Feb 2025 - Present

- Led a three-month migration of 2,000+ advertising accounts from TapClicks to NinjaCat, coordinating multiple teams and defining scalable ingestion and reporting structures for campaign performance and client billing.
- Designed unified NinjaCat datasets combining Google Ads, Meta and TikTok API data while accommodating platform differences and account-specific reporting requirements.
- Contributed dbt models to the gold layer of a new Redshift-based warehouse and developed Cube.js semantic models for analytics consumption.
- Established validation frameworks covering key metrics, account totals and configuration completeness across users, groups and platform accounts.
- Replaced a manual campaign-pacing spreadsheet with a Preset dashboard modeling daily and monthly impression delivery against targets, including client-specific rules and billing dependencies; the solution supports approximately 35 users.
- Built Python automations and agentic workflows that detect new accounts and users, trigger Slack-based operational processes, assign account permissions and recommend mappings for unlinked advertising accounts.

Senior Data Analyst

Qubika | Mar 2024 - Feb 2025

- Led the analytics workstream for a real-estate investment client, coordinating data engineering and business stakeholders across delivery.
- Developed SQL and dbt models for the gold layer of a GCP data platform and delivered Power BI dashboards for investment scenarios, profitability, costs and expected ROI.
- Defined and coordinated a production AI knowledge assistant used by the CEO, CFO, sales team and operations leadership.
- Designed the assistant's business and semantic requirements over an Azure data warehouse, combining structured data with RAG-based retrieval from internal documents.
- Mentored three junior data professionals and coordinated stakeholders, software engineers and AI engineers across product definition, modeling and implementation.

Data Analyst | Analytics Engineer

Yalo | Jan 2022 - Feb 2024

- Redesigned the gold layer of a BigQuery-based platform, consolidating redundant analytical tables into clear, purpose-specific dbt models and Cube.js semantic models.
- Led a company-wide governance initiative to define, standardize and document approximately 20 core metrics, including calculation logic, sources and ownership.

PROFESSIONAL EXPERIENCE - CONTINUED

Data Analyst | Analytics Engineer (continued)

Yalo | Jan 2022 - Feb 2024

- Developed score-based identity-resolution logic using names, addresses, phone numbers and internal identifiers to connect users across client environments.
- Built campaign and attribution analytics for a WhatsApp-based conversational commerce platform, helping teams compare campaign performance and identify stronger outcomes.
- Developed LookML models and Looker dashboards for Commerce, supporting approximately 10 internal users and 20 external clients while leading initiatives across Product, Customer Success, Marketing and Data.

Data Analyst | Business Analyst

APPA! | Feb 2021 - Dec 2021

- Analyzed transactional and customer-support data for a mobile engagement platform used by shopping centres and retail brands to deliver digital promotions, discounts and rewards.
- Developed PostgreSQL analyses and dashboards in Power BI and Google Data Studio, supporting five to six internal teams and recurring reporting for seven to eight shopping-centre clients.
- Launched the company's first embedded client-facing dashboard, enabling retail brands to monitor store transactions and access customer and performance insights directly.
- Developed behavioral segmentations for customer-activation campaigns and created industry benchmarks for comparable clients and target audiences.
- Delivered Power BI training to 15 colleagues, improving internal adoption of self-service analytics.

Data Visualization Analyst

Accenture | Aug 2020 - Jan 2021

- Automated facilities-cost reporting by replacing manual SAP downloads, data reconciliation and Excel workflows with standardized Power BI dashboards.
- Developed reporting for Accenture's US building portfolio, including expense analysis and forecast-versus-actual comparisons for two regional operations teams.

EDUCATION

Bachelor's Degree in Business Administration | UCES, 2019-2024

Tertiary Diploma in Design, Fashion Orientation | ORT, 2013-2015

CERTIFICATIONS & SELECTED TRAINING

Databricks Data Analyst Associate (2024) | Google Data Analyst (2020) | dbt Fundamentals (2023)

LANGUAGES

Spanish - Native | English - Full professional proficiency
